

# TRITEC

ENERGY FOR A BETTER WORLD

## TRI-STAND

The smart insertion system for  
PV systems on trapezoidal sheet metal.

- 
- simple
  - quick
  - efficient

### The main advantages:

- Floating rooftop system, therefore no thermal separation necessary
- Simple, quick and efficient installation
- Considerable time and thus cost saving
- Optimum load distribution and stability
- Suitable for all common framed solar modules

# TRI-STAND FOR TRAPEZOIDAL SHEET METAL

This way you easily increase your efficiency

Realize your projects in an unbeatably short time: The smart planning software, the few components and the patented SafeClick assembly enable an extremely quick, safe and simple installation of the PV insertion system TRI-STAND on the roof. The PV modules are easily inserted into the insertion profiles and are held in place by their own weight. Additional fastening of the modules is completely unnecessary.

## TRI-STAND is installed in just a few steps

**1. Measuring and predrilling the module field**  
According to the design plan, the module field is measured on the roof. Then the trapezoidal sheet metal covering is pre-drilled using the TRITEC drilling jig.

**3. Clicking the TS insert profiles into the SafeClick**  
The insertion profiles are clicked into the SafeClick and are floatingly connected to the roof. Damage to the roof and module caused by thermal expansion is thus avoided.

**2. Riveting the SafeClick onto the trapezoidal sheet**  
The proven SafeClick is mounted directly onto the trapezoidal sheet metal by rivet<sup>1</sup>, whereby considerably fewer fastening points become necessary.

**4. Inserting the modules into the TS insertion profiles**  
The modules are inserted into the insertion profiles and are held in place by their own weight - there is no need for additional fastening.

<sup>1</sup> Also available as screw version with TRI-STAND thin sheet metal screw 6.0 x 25 DS.

# THE SYSTEM COMPONENTS

Extremely fast assembly with few components

With TRITEC you have the choice: Many components of the PV insertion system TRI-STAND are available in the colour selection „black“ and „blank“ (aluminum silver). Completely tailored to your needs: The profiles and variants marked with \* are available in different lengths on request.

Colour key: ● black | ● blank

**TRI-STAND insertion profile**  
● Standard  
• variants: TS-30/32/35/38/40  
• colour selection black / blank  
• available in different lengths\*

**TRI-STAND end profile**  
● Optional  
• variants: TS-30/32/35/40  
• colour selection black / blank  
• available in different lengths\*

**TRI-STAND Special SafeClick**  
● Standard  
• pre-assembled incl. rivet & seal  
• black, item no.: 1503075  
• blank, item no.: 1502987

**TRI-STAND insertion profile connector TS-C**  
● Standard  
• black, item no.: 1502417  
• blank, item no.: 1502216

**TRI-STAND end bracket TS-E**  
● Standard  
• black, item no.: 1502307  
• blank, item no.: 1502214

\* Information on lengths and part numbers on request.

## LEARN MORE

Videos, planning and contact

Simply scan the QR code or visit the following link to get more information about TRI-STAND for trapezoidal sheet metal, such as installation video, installation instructions and references.

### The optimal mounting solution for every roof

TRITEC mounting systems combine over 30 years of photovoltaic experience. Our own products TRI-STAND, TRI-ROOF+, TRI-CLIP and TRI-FLAT Easyspeed offer optimum PV mounting solutions for the various requirements of different roof types and alignments. We attach great importance to the high-quality processing of the components as well as to the durability of the substructure.

For further information on our products and services, please visit our website at [www.tritec-energy.com](http://www.tritec-energy.com) or our online shop at [shop.tritec-energy.com](http://shop.tritec-energy.com).

You can also contact our experts directly at any time, who will be happy to answer any questions you may have.
